

Olabs FiberFlex[™] - Fiber Raceway System

Manage Your Future Fiber Growth

Olabs FiberFlex[™] Fiber Raceway System provides you with a cable routing system that suits you today, while allows you to prepare and adapt to your fiber growth needs in the future. Olabs' versatile fiber raceway system is the perfect solution to provide a safe and dedicated path for your mission critical network cabling, suitable for data centers, central offices, head-ends and wiring closets.

Our cable routing system offers in 120/240/340-Series which composed of various support structures and fittings. The fiber optic cables being carried is easy to add and remove, while accommodating a vast amount of cables inside. Different shapes and drop-off options provide you with extreme flexibility on future expansion, allowing you to add parts when needed or change and relocate to other areas when required.

Features :

- For routing and protecting fiber optic cables
- Various sizes to accommodate your needs
- Fire-retardant materials
- Available in standard yellow and orange colors
- 40mm bending radius for great fiber protection
- Safe and easy access to fiber
- Snap-on joints for connecting components
- Compatible with other fiber raceway systems

Specifications

Operating Temperature	-25°C ~ +55°C
Relative Humidity	< 85% (+40°C)
Atmospheric Pressure	70kPa – 106kPa
Fire Retardant	Complies to GB/T2048
Color	Pantone 116C (Yellow)

**Simple to Deploy |
Save Time & Cost**

**Safe for Fire-retardant |
Flexible in Add, Change, Move**

**Durable |
Superior Strength**
